

# Cascade Stereoscopic Club

## *A Portal to Your Inner Vision*

The Cascade Stereoscopic Club is your primary destination as you journey to learn how the vision of your realities can be preserved beyond your lifetime by the media of stereographic art. The Cascade Stereoscopic Club (CSC) centers on the world of stereography. The 3D Center of Art & Photography opened to the public in February 2004 and is the result of the pioneering dreams of members of the Cascade Stereoscopic Club. CSC is dedicated to presenting and preserving 3-dimensional images through monthly meetings, mentoring, sharing your art, an online discussion group, and public outreach.

The educational agenda of CSC is to teach anyone interested how to capture the reality of what we see in those original three dimensions. The most popular methods involve STEREO PHOTOGRAPHY. By making a picture of the same scene from two slightly different positions at the same time, a stereoscopic photograph is created. By viewing the two pictures in such a way that the left image is presented only to the left eye, and the right image to the right eye, the image

Is seen in true stereoscopic 3D. Your brain does it and the resulting image has all the cues of a flat photograph, plus the depth that flat photos do not have. Observers of 3D photos feel as if they stepped into the actual scene where the photograph was taken. 3D photos are usually made with a two lens camera, whether it be still images or movies. Two identical cameras can be used together with synchronized shutters as is evidenced by the 3D digital images being made today. By shifting a single camera between the left and right shot, excellent still life images can be made. 3D images can be viewed by various means of projection, with hand-held viewers, and as digital displays on your personal computer. The Cascade Stereoscopic Club offers workshops which will get you started fulfilling your 3D imagination.

## 3D Center of Art & Photography

In 2003, CSC with the help and support of the stereo community nationwide founded the 3D Center of Art & Photography. The 3D Center showcases world premiere showings of the art of contemporary stereographers. The showcased artists' prints and audio-visual shows rotate every 5-6 weeks.

The 3D Center houses one of the first ever photography museums dedicated solely to the stereoscopic medium. A rotating display of fine antique to modern 3D apparatus including 3D images in all their historical and contemporary genre make a visit to the 3D Center especially memorable.

Audio-visual big-screen show presentations, periodic workshops, and hands-on demonstrations will make your visit to the 3D Center unique.

A gift shop will ensure that you go home with 3D gifts for friends or a special book for that special place in your library.

Thursday—Sunday 1 PM—5 PM  
1st Thursday 6—9 PM

CSC was the first photography club in the world to be approved by PSA to conduct stereoscopic competitions and exhibitions of digital imagery on the Internet! Visit our website where you will find the full archives of 3D images of past exhibitions.

CSC hosts annually a PSA approved stereoscopic exhibition in which anyone may submit stereoscopic images in the form of slides, prints, or digital files.

- Workshops and tutorials
- In-club competitions, slide & card viewing
- Advice on taking better pictures
- Advice on techniques & equipment
- Digital Stereo Photography
- Internet discussion groups
- Friendship and fun
